## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 1-5 and 9, drawn to an ultrasonic welding apparatus and method.

Group 2, claim(s) 6-8, drawn to and object with a matte pattern.

2. The inventions listed as Groups 1 and 2 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The products of group 2 contain a product with a matte pattern formed by a welding process. The inventions of group 1 contain an ultrasonic apparatus and method. While these appears to be a correlation between the matte surface finish of the product and apparatus a matte finish can be created on the surface of an article by any welding means and does not provide any contribution to the art. Proof that this limitation does not provide any contribution to the art can be seen in Japanese Patent 62-21112A which a welded metal object imparted with a matte finish.
